

## Iowa Electric Light and Power Company

November 25, 1980  
LDR-80-350LARRY D. ROOT  
ASSISTANT VICE PRESIDENT  
NUCLEAR GENERATIONMr. Harold Denton, Director  
Office of Nuclear Reactor Regulation  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Mr. Denton:

The purpose of this letter is to inform you of our intent to provide responses to NUREG-0737 requirement II.K.3.30, Revised Small Break LOCA Methods to Show Compliance with 10CFR50 Appendix K, through the General Electric Company. It is our understanding that discussions between NRC staff members and BWR Owners' Group participants at the September 22, 1980 clarification meeting in Washington, D.C. indicated that this method of response would be acceptable.

We request that the staff direct their questions regarding the scope and schedule to General Electric (Attn. R. H. Buchholz, Manager, BWR Systems Licensing), and that copies of correspondence concerning this item be sent to Iowa Electric so that we may remain aware of the progress of resolution of the staff's concerns. GE has informed us that they will be prepared to discuss the approach to this item by December 15, 1980.

Very truly yours,

Larry D. Root  
Assistant Vice President  
Nuclear Generation
