

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
REGION I  
631 PARK AVENUE  
KING OF PRUSSIA, PENNSYLVANIA 19406

31 OCT 1980

Docket Nos. 50-317  
50-318

Baltimore Gas and Electric Company  
ATTN: Mr. V. R. Evans  
Vice President, General Services  
P.O. Box 1475  
Baltimore, Maryland 21203

Gentlemen:

Subject: Combined Inspection Nos. 50-317/80-12 and 50-318/80-11

This refers to your letter dated September 22, 1980, in response to our letter dated August 29, 1980.

With regard to the comment in your letter concerning Unresolved Item (UNR 50-317/80-12-01 and 50-318/80-11-01) affecting the protection of certain vital system components identified in Paragraph 8, USNRC Combined Inspection Report dated August 29, 1980, this matter has been referred to the Physical Security Licensing Branch, Division of Safeguards, USNRC, for resolution. Consequently, until the above matter is resolved, we have no comment to your response which contends that your "present protective measures fully comply with the approved MASP." However, we take exception to your statement in the response to the effect that there was no agreement during the inspection to review this identified weakness for the purpose of developing some method of corrective action. Moreover, when the Inspector discussed this matter as a potential item of noncompliance at the management exit meeting on July 18, 1980, members of your staff agreed to review the course of action essential to rectifying these weaknesses in your physical protection program as was restated in the above subject combined inspection report.

Thank you for informing us of the corrective and preventive actions to the four items of noncompliance documented in your letter. These actions will be examined during a subsequent inspection of your licensed program.

In accordance with Section 2.790(d) of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations, documentation of findings of your control and accounting procedures for safeguarding special nuclear materials and your facility security procedures are exempt from disclosure; therefore, the attachment to the referenced letter will not be placed in the Public Document Room.
