Washington, D.C. 20555

Re: Docket 50-289SP, TMI-Unit 1

Dear Mr. Ahearn and members of the Commission:

It is of utmost importance that TMI-1 be restored to service as soon as possible.

This unit is different from TMI-2, was not involved or damaged at the time of the accident in March, 1979, and has since been modified so that it is now safer than before.

Nuclear power is safe, inexpensive and essential to the energy supply of our country and should not be further delayed.

Sincerely yours,

H. A. Hansen
