Dear Mr. Kinneman:

In response to your Notice of Violation dated January 6, 1981, the following is Westmoreland Hospital's plan of correction.

A form has been developed that will clearly document our quarterly physical inventories of our radioactive sources in Group VI, i.e. Cesium - 137 and Strontium - 90. The fourth quarter inventory for 1980 was conducted December 15, 1980. All sources were present.

Thank you for your help. Please contact me if I can be of any further assistance.

Sincerely,

Walter S. Van Dyke
Director of Operations
