Export and International Safeguards

Attn: Mr. R. Neal Moore

Dear Mr. Moore:

Enclosed is an application form for an export license for Tritium.

My customer is Isorad, a company in Israel, that manufactures self-luminescent products.

Presently Isorad is negotiating the sale of spheres to an American company by the name of "Action Manufacturing Co. of Philadelphia."

Enclosed also is a request for quotation from Action Manufacturing to Isorad and a letter from Isorad to me about the end use of the Tritium.

I hope that this explanation is sufficient to provide me with the export license.

Please process this request as soon as possible as the price of Tritium might change.

Sincerely yours,

Isaac Goldlust
Director
