JERRY LUHN
President - Board of Directors

May 15, 1981

U.S. NRC
Washington, DC 20555

TO WHOM IT MAY CONCERN:

I am very concerned that consideration is even being given to the reopening of the undamaged TMI unit. Knowing the hazards of radioactive wastes and the imperfections of the technology dealing with this problem, I am astounded that any nuclear plants remain in operation.

I would hope that concern for human life would be the motivating force behind a permanent closing of TMI. If not -- the devastating economics, imperfect technology and environmental destruction should serve to keep the plant closed.

Sincerely,

Patti Croop
