GLENN L. KOESTER
VICE PRESIDENT, NUCLEAR

October 8, 1980

Mr. Darrell G. Eisenhut, Director
Division of Licensing
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

KMLNRC-031

Re: Docket No. 50-482

Ref: Letter of 7/11/80 from NRC to Applicants for
Operating Licenses and Construction Permit
Holders and letter of 8/12/80 from G.L. Koester
to Darrell G. Eisenhut

Dear Sir:

In my letter of August 12, 1980 responding to your July 11
letter concerning Wolf Creek Generating Station fuel load and
commercial operating date, I indicated that by early October
I might be able to give you a more accurate date for these
activities.

On October 7, 1980, Kansas Gas and Electric Company and Kansas
City Power & Light Company announced that fuel load would be
rescheduled for April 1983 and commercial operation on April
1984.

If you need additional information concerning this issue, please
advise me.

Yours very truly,

GLK:bb
