

July 1, 1980 through December 31, 1980

United Nuclear Corporation - Naval Products Division

Principal Radionuclides: ^{234}U and ^{235}U from Enriched Uranium

Curies

Liquid Effluent (1.36×10^5 gallons released)	$2.1 \times 10^{-3}\text{Ci}$
Gaseous Effluent	$1.8 \times 10^{-5}\text{Ci}$

NOTES:

- (1) Specific activity factor used is 8.24×10^{-5} Curies/gram.
- (2) Data reported is compiled from measurements taken at points of release on site and has not been adjusted by dilution factors which would be applied to calculate releases to unrestricted areas.
