Gentlemen:

Pursuant to Title 10, Code of Federal Regulations, Chapter 1, Parts 30, 40, and 70, Materials License No. SNM-1265 is hereby amended to adopt NEDO-21326C (C-Series Consolidated Safety Analysis Report) as the reference safety analysis report. This amendment is granted in accordance with your request dated January 23, 1980. Accordingly, Item 11 of License No. SNM-1265 is modified to read as follows:

"11. The licensee shall receive, possess, store, and transfer licensed material in accordance with statements and representations contained in the Consolidated Safety Analysis Report for the Morris Operation, NEDO-21326C, and subsequent revisions; Chapter 10, Operation Specifications, shall contain specifications and criteria for routine operation and maintenance of the facility. Changes to these specifications and criteria shall constitute an amendment to the license and may be made only with prior approval of the Nuclear Regulatory Commission."

We note that by your letter, dated November 14, 1980, you have withdrawn your request for the incorporation of provisions for facility changes, tests, and experiments, identified as item (b) in your letter of January 23, 1980.

All other conditions of this license shall remain the same.

Based on our review of your application, we have concluded that this license amendment is an administrative action and fulfills the requirements of 10 CFR Section 70.23(a). We have also concluded that the issuance of this amendment is not a major Federal action significantly affecting the quality of the human environment and that, pursuant to 10 CFR 51.5(d)(4), no environmental impact statement, negative declaration nor environmental appraisal need be prepared.
