

March 6, 1981

Secretary of the Commission  
U.S. Nuclear Regulatory Commission  
Washington, D.C.

NUMBER  
PROPOSED RULE

PR-73

(45 FR 81065)

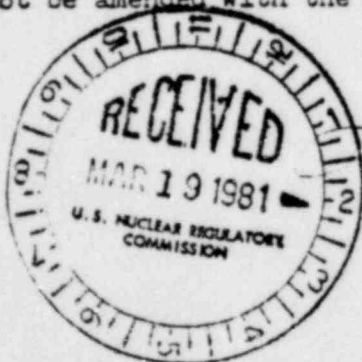

Hello;

I am writing to express my concern with 10 CFR Part 73--Advance Notification to Governors Concerning Shipments of Irradiated Fuel. I feel that to deregulate low-level radioactive wastes and the subsequent transportation of such wastes under the protection of National Security Information is an impingement of my civil rights.

We all as citizens should have access to information concerning the transport of materials hazardous to our health--to exempt any radioactive wastes from advance notification poses serious threats to all communities.

I feel that it is our RIGHT to know about anything which is potentially dangerous--which radioactive wastes surely are--and withholding this information is to deny our basic rights as citizens.

I truly hope that the Advance Notification to Governors will not be amended with the proposed 10 CFR Part 73.

Sincerely,

Lori Jaye Joseph
