NRC Research and Technical
Assistance Report

March 19, 1981

*permanently on file
March 19, 1981*

Mr. R. C. Robinson
Division of Safeguards Fuel Cycle
and Environmental Research
U.S. Nuclear Regulatory Commission
MS 1130SS
Washington, D.C. 20555

Dear Mr. Robinson:

The following letter report for February 1981 is submitted in conformance with the contractual requirements for the referenced contract.

The report entitled "Institutional Issues Associated with Spent Fuel Storage Under Domestic and International Auspices" was completed.

The only FY80 report now outstanding is "An Examination of NRC's Role in International Nuclear Commerce", this report is now in preparation.

The next monthly report will contain a list of titles and estimated due dates for FY81 reports.

Research for FY81 reports has been underway for some time and is reflected in the cumulative budget and expense report.

Please notice in the attached Budget and Expense Report that the expense to date is only \$14,000 dollars above the \$20,000 covered over into FY81 for FY80 work. This excess over \$20,000 reflects the initial work being done on FY81 work.

Yours sincerely,

Jerry Cadwell
Technical Support Organization
