Response to IE Bulletin #81-01

Dear Sir:

By letter dated January 27, 1981, you transmitted IE Bulletin No. 81-01, "Surveillance of Mechanical Snubbers". Boston Edison Company was requested to visually examine and test all normally accessible INC mechanical snubbers installed on safety-related systems or in storage, at Pilgrim Station, as the first phase of a mechanical snubber surveillance program.

Response

Pilgrim Station does not have in use or in storage or planned for use in safety-related systems any INC mechanical snubbers.

very truly yours,

*Almond*
