Mr. James G. Keppler
Region III
U.S. NUCLEAR REGULATORY
COMMISSION
799 Roosevelt Road
Glen Ellyn, IL 60131

SUBJECT: Toledo Edison
Davis-Besse
Docket 50-346

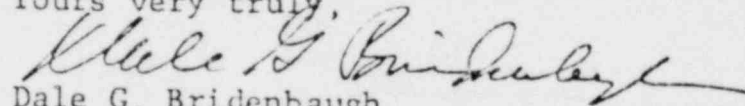

Dear Mr. Keppler:

My March 10 letter to you advised of an apparent breakdown in the handling of security-related information pertaining to the Davis-Besse plant. This letter is to provide further information on the origin of the proprietary pages of the IE Reports found in the Ohio Consumer Counsel's (OCC) files.

OCC attorney Tim Jochim advised me today that they now believe the proprietary documents were furnished by Toledo Edison in response to a data request made by the Ohio Public Utility Commission (PUCO) staff. This would have been in conjunction with a Fuel Case designated as 79-233-EL-FAC. It is not known whether the OCC copies were obtained by them from the PUCO staff or if they were furnished directly by Toledo Edison.

This means that it does not now appear that Cleveland Electric Illuminating (CEI) was involved in the furnishing of the documents in question. It also means there is probably now at least one other location at which uncontrolled security documents exist---the PUCO staff files. Since I am really not directly involved in the OCC-PUC staff relationship, and since I no longer have any of the documents, I suggest you contact Mr. Jochim at the OCC office if you wish to pursue this. The OCC is located at 137 East State Street in Columbus.

Yours very truly,

Dale G. Bridenbaugh
