Mail Stop 461-SS  
Silver Springs, MA 20910

Dear Fred:

RE: Wyoming DEQ TFN 1/5/201  
NRC Docket #40-8781

It was a pleasure having you visit Teton's facilities. We feel it was a real benefit to have the individuals reviewing our application see the site and to be able to discuss the initial review questions on an individual basis.

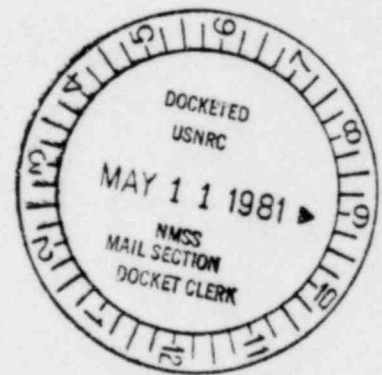

Please find attached one set of revisions dated 3-16-81, which will bring your copy of Teton's state application up to date. Each revised page in the text has the latest revision date on the bottom. To bring your copy up to date just replace the existing pages, maps or figures with the information provided in the revised data package and discard the old pages. I will be forwarding additional revisions to keep you up to date with the adjustments made during the state's review and to aid you in the review of our source material license.

We appreciate your efforts in our behalf and are looking forward to working with you to complete this license for Teton. Please do not hesitate to call me at any time I may be of assistance.

Sincerely yours,

Richard R. Appel  
Permits Coordinator
