REMARKS (Jim Jones of my branch will be coordinating NRC comments for our ballot vote since Walt Cool is working on Part 20 revision.)

Enclosed please find a copy of the final attempt of the ANSI working group for ANSI N13.11 Standard. As you can see this has been sent out to the N13 committee for rebalot. I have distributed also for your perusal, a copy of the original comments from the summer balloting from last year. You will note that there has been a response by Dr. Ehrlich's committee to all comments.

Comments should be forwarded to me at 4435991 or by mail to NL5650 as soon as possible. Currently we do not know of any exceptions that we plan to take to the Standard. The conversion values chosen by the Committee were based on the British data by Dymbylow & Francis which were folded into NBS specific techniques. **DO NOT use this form as a RECORD of approvals, concurrences, disposals, clearances, and similar actions**
