Michigan State University 1855-1980

College Hall (above) was the first building in America erected for teaching scientific agriculture. It was one of three buildings carved out of the forest to form a campus that now sprawls over 5,100 acres. The drawing (top) of Michigan Agricultural College in the 1920s and the aerial photo (below) taken in the 1970s illustrate the dramatic physical changes that have taken place in the institution's 125-year history.

FINANCIAL REPORT 1979-80

Michigan State University

seeds taken from one of 20 bottles that botanist William J. Beal buried on campus 101 years ago, in an experiment to determine how long seeds remain fertile.

The sprouts provided an eloquent tribute to the continuing vigor of a university marking its 125th anniversary as the nation's first agricultural college. The seeds' successful performance was a silent testimonial to both past accomplishments—including the introduction of more than 100 new crop varieties developed by MSU scientists such as Beal—and the promise of future achievements.

The anniversary itself was commemorated quietly, without fanfare, at a university preoccupied with the present. It was a time of transition on campus: in administration, academics, athletics, and appearance.

In the administrative arena, Cecil Mackey became MSU's sixteenth president and its first to be officially inaugurated. Among those attending the November 30 induction ceremony were delegates from other academic institutions and former MSU presidents John Hannah, Walter Adams, and Edgar Harden, with Clifton Wharton stalled by a New York snowstorm.

While Mackey was beginning to leave his mark on MSU history, the impact of the university's longest serving president, John Hannah, became more visible. In January, Hannah's name was finally affixed to the outside of the Administration Building, officially named for him when it was constructed a dozen years earlier. And in June, the MSU Press published Hannah's thoughts on his 28-year tenure in the book, A Memoir.

MSU has had four presidents in the decade since Hannah retired, a fact some observers consider indicative of the increasing demands involved in running a major modern university. Indeed Robert Clodius, president of the National Association of State Universities and Land Grant Colleges, commented on the complicated life of a university president in his inaugural address. At his elbow, Aggie Howe of MSU's Office of Handicapper Services provided deaf viewers with an interpretation of the televised speech—as well as a visible reminder of the changes the university has undergone since its founding.

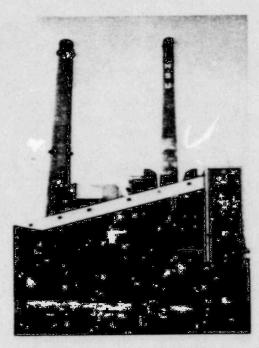

Photos courtesy MSU Archives

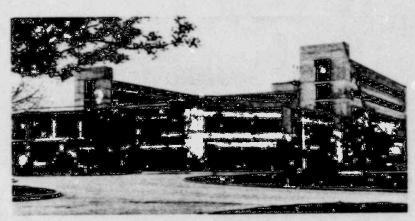

The first scientist to develop high-yielding corn hybrids by cross-fertilization, botanist William J. Beal began MSU's long-est running experiment by burying 20 seed-filled bottles in a secret campus location.

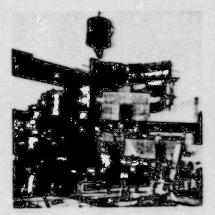

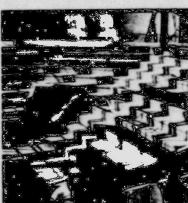

Former presidents John Hannah, Walter Adams, and Edgar Harden as well as more than 100 representatives of other academic institutions attended the November 30 inauguration of Cecil Mackey (seated), MSU's sixteenth president.

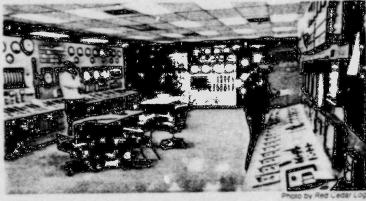

The recently completed addition of baghouse filters at the MSU power plant became necessary to remove the fly ash generated when the plant converted from gas to coal in 1972.

The latest buildings to join the more than 380 structures on campus are the Communication Arts Building (top), which is well underway on Wilson Road, and the Performing Arts Center (below), beginning to take shape on Bogue Street. The facilities are scheduled to open in 1981 and 1982 respectively.

Building environments are centrally controlled as part of a campus energy conservation program. MSU's cogeneration power plant uses about 70 percent of its fuel energy to generate electricity and steam heating and cooling; above, control room operators keep the plant at peak performance levels.

Energy shortages were unheard of but a building shortage was the foremost concern when Ted Simon (right) began working at MSU in 1946. "It seemed like we were always behind then—the need was 50 great for facilities," says Simon who, as vice president for the Physical Plant, is in charge of campus building construction, maintenance, and operation.

From an initial enrollment of 63 students in 1855, MSU had mushroomed to a record-high 44,756 enrollment by the 1979 fall term, making it the state's largest and the nation's third largest institution of higher education. For the first time since women were admitted in 1870, female undergraduates outnumbered their male counterparts.

The plummeting enrollments predicted for the 1980s were not yet evident at MSU, where academic diversity coupled with a sluggish economy and restricted job market hiked student numbers to peak levels. Buoyed by attractive employment prospects available to its graduates, the College of Business experienced an enrollment increase of nearly 20 percent last year. Enrollments in the School of Packaging, the first in the nation to offer a packaging degree program, more than doubled in the last decade. Engineering programs continued to be among the campus enrollment leaders, in direct response to the hiring demands of business and industry.

In a variation of the traditional refrain, deans began asking how they could keep faculty down in the departments after they had seen starting pay scales for recent graduates. Private sector employers offered graduates of some four-year degree programs salaries comparable to those of middle-ranked faculty. Administrators grew apprehensive about convincing enough talented students to enter graduate programs and eventually fill future faculty openings.

To enhance MSU's ability to compete with outside employers, President Mackey recommended that the trustees award an unprecedented 2 percent mid-year pay boost to faculty and administrative-professional staff. The salary increases, effective April 1, were to be financed by a 1.5 percent cut in base budgets for the 1980-81 fiscal year. In anticipation of stringent reductions in state appropriations to MSU, a position management program was initiated to review nonacademic positions as they became vacant, with an eye toward eliminating the unessential.

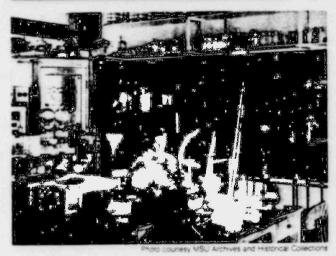

In another effort to bolster both academic and economic resources, a switch from a quarter to a semester system was debated by campus academic governance groups. In proposing the conversion, Provost Lee Winder called the semester "a better learning experience for students." He cited cooperative research with faculty at universities on the more prevalent semester calendar plus reduced registration expenses as additional benefits. A faculty-student task force was formed to study the Provost's proposal.

he MSU Graduate School entered its 50th year basking in a glowing record of outstanding performance by previous scholars—such as MSU's first Nobel Prize winner. Alfred Day Hershey, Ph.D. '34—and the bright batch of current advanced degree candidates.

Seven winners of National Science Foundation (NSF) fellowships enrolled in MSU graduate programs in chemistry, psychology, electrical engineering, zoology, and microbiology and public health. MSU earned a first-place ranking among U.S. universities in the number of NSF fellowships and honorable mentions awarded to its undergraduates in 1979. Since 1973, MSU students have led the Big Ten and maintained second place among all U.S. college students in NSF grants received.

During the last 15 years, NSF grants also have covered construction and operating costs of the MSU Cyclotron Laboratory. A new NSF-funded cyclotron, rated at 500 million electron volts (MeV), is being constructed. In January, a \$25.7 million contract between MSU and the U.S. Department of Energy authorized construction of a second, 800 MeV cyclotron. Operating in tandem, the powerful cyclotron pair will be expable of heavy ion acceleration. The MSU facility, 1.3W known as the National Superconducting Cyclotron Laboratory, is expected to be at full capacity by 1984. It will be used by visiting scientists as well as MSU faculty and will be an asset in attracting graduate students in physical science programs.

The School of Nursing was awarded college status, helping it keep pace with other U.S. nursing programs in the recruitment of faculty, students, and research grants. The strong demand for highly skilled nurses in today's complex health care system has sparked a national trend to upgrade professional nursing preparation, with the bachelor's degree evolving as an entry-level requirement. The College of Nursing, which awards both bachelor's and master's degrees, will enhance the university's reputation for quality health programs.

In 1902, Marshall Hall (top) became the first building in North America devoted to the study of bacteriology. In bacteriology laboratories like the one shown above, Professor I. Forest Huddleson earned worldwide attention by developing a test and treatment for bruccellosis (undulant fever), and graduate student Alfred Day Hershey began a research career that eventually earned him a Nobel Prize.

Botanist Ernest A. Bessey (above) was the driving force behind the creation of the Graduate School and served as its first dean. In his 14-year deanship, doctoral fields doubled.

The Graduate School - 50 years

The MSU Graduate School was established in 1930, although master's degrees had been awarded since the 1880s and the first doctoral programs were authorized in 1922.

MSU ranks first in the Big Ten for the number of 'vational Science Foundation (NSF) graduate fellowships awarded to its students since 1973. During the last academic year, seven NSF fellows were pursuing graduate degrees in five MSU departments. Shown above, clockwise from upper left, the NSF fellows and their fields are: Steven Warach, experimental psychology; Owen Anderson, zoology; Wendy Cooley, microbiology and public health; Carl Kircher, chemistry; David Myroid, microbiology and public health; and Ramon Sandin, microbiology and public health. Not pictured is Douglas Luse, electrical engineering.

POOR ORIGINAL

College of Veterinary Medicine

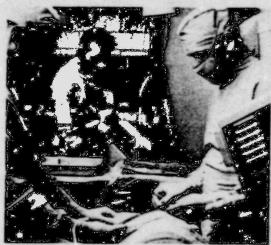

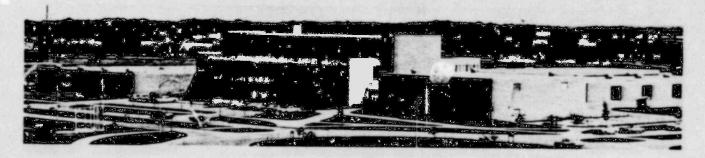

A veterinary laboratory was built in 1885 to accommodate the first campus veterinary science courses. A * ** ree program was begun in 19

The vet lab housed a dissecting room where students took apart horses and an operating room where surgery was performed on campus livestock and animals from nearby farms. Today, cameras focus on clinical procedures to give students a televised view of the surgeons' perspective. MSU's Veterinary Clinical Center treats about 2,600 farm animals each year in its Large Animal Clinic as well as some 15,000 pets in the Stall Animal Clinic.

SU is the only university with three medical schools granting M.D., D.O., and D.V.M. degrees. The College of Veterinary Medicine, celebrating its 70th year, is the oldest campus medical program and the state's only vet school. The college's four-year program trains students in both large and small animal surgery and medicine and in optional specialities such as opthalmology and orthopedics.

The veterinary profession has grown dramatically since the turn of the century, when most vets lacked formal training, notes C. C. Morrill in the recently published Veterinary Medicine in Michigan: An Illustrated History. In preparing the definitive text Morrill, pathology chairman emeritus, relied on the MSU Library's Special Collections, which has what some consider the world's finest collection of rare books on the history of veterinary medicine.

Last summer, MSU became the first in the Big Ten to install a computerized library circulation system. Using the same technology that is streamlining supermarket checkout procedures, a laser scanner reads barcode labels on identification cards and docurnts to be checked out, thereby transmitting information on each transaction to a computer. The computer maintains records on inventory circulation and processes overdue notices.

The Library's minicomputer is one of several data processing systems installed on campus last year to meet the burgeoning demand for computer access among faculty and students. Enrollment in MSU Computer Laboratory courses has more than doubled in seven years, as more and more disciplines discover ways to harness the hardware for basic and applied studies.

he campus is a microcosm mirroring the twentieth century's mass communications revolution. The university operates higher education's largest instructional television service, with TV programs used in more than 450 courses. About 13,700 calls per hour are handled through some 21,000 telephones in campus offices and housing units. To facilitate the widespread and complex communications network on campus, a broadband coaxial cable system has been developed. When fully implemented, it is expected to save an estimated \$990,000 a year by serving all internal communication needs, except telephones.

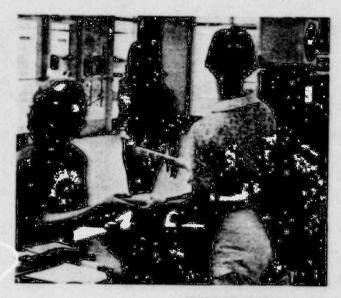

The Library's Special Collections, in the east wing basement, recently received a seven-volume set of John James Audubon's The Birds of America. Librarian Jannette Fiore (above) displays the gift which, along with other items housed in Special Collections, may be viewed by the public.

Installation of the three-cable system began in 1979. Parts of the university's central control system, which regulates heat, ventilation, and air conditioning use, are currently on line. Data processing and instructional television systems are being linked to the cable. MSU's cable system won an award from the National Association of College and University Business Officers for cost-saving innovations introduced in 1979.

Savings from campus energy conservation programs amount to about \$3.5 million a year, according to Physical Plant estimates. Energy-conserving features, such as double-glass windows, have been installed in buildings constructed on campus since the 1950s. In the last decade, building environments have been centrally controlled and based on occupancy.

Since the first cogeneration power plant was installed on campus in 1950, MSU has been among the institutions with the lowest utility costs. The recently installed baghouse filters now in service remove almost all fly ash generated by power plant boilers, allowing the university to meet air quality standards.

Projects to meet standards for handicapper accessibility and fireproofing were undertaken in several buildings. Typical alterations included conversion of elevator operating devices for use by handicappers and installation of fire doors, fire escapes, and sprinklers. Acoustical ceiling and wall tiles in the 40-year-old MSU Auditorium were replaced with fireproof tiles.

The new computerized circulation system in the library uses bar-cod labels and laser scanners.

The Auditorium alterations were an anticlimax to the Board of Trustees approval in September of contracts for construction of the Performing Arts Center. After years of planning and a multimillion dollar fund-raising effort, building began at the Bogue Street site in October. Expected to be completed in June 1982. the center will feature a 2,500-seat Great Hall for symphonic and operatic productions and a 600-seat theater for dramatic and musical presentations.

A new football building, named for legendary Spartan coach Duffy Daugherty, opened in April. It was soon fille with bodies sweaty from spring practice, where head football coach Frank "Muddy" Waters was also making his debut. Former Spartan football player and assistant football coach Doug Weaver was fielded as MSU's new athletic director from a similar post at Georgia Institute of Technology. Weaver and Waters both played football under Spartan coach Biggie Munn. The 57-year-old Waters had coached Michigan high school and college teams for 30 years before accepting the MSU assignment and handled criticism of his age with humor.

The oldest of the ten MSU women's varsity team sports is field hockey. Last fall, for the first time in 28 years, MSU's team qualified for national competition against powerful eastern school teams, which have long dominated the game. In November the women's cross country team proved it, too, is a force to reckon with as it finished eighth in the AIAW (Association of Intercollegiate Athletics for Women) national competition-the fifth top-ten finish for a Spartan team in the six-year-old contest. And in the spring, a Big Ten championship earned by the women's gymnastics team for the third consecutive year capped an active year for MSU's female athletes.

t was also a year during which wide-ranging social issues came to the fore on campus. The 26-member MSU International Year of the Child Committee hosted a Congress on the Future of Children in Michigan to develop recommendations on policies and actions to be made to the university and other agencies.

Following a campus speech in October on "Crucial Issues in International Urban Affairs," former U.S. Ambassador to the United Nations Andrew Young made five appearances at MSU during spring term as visiting professor in the College of Urban Development. In addition to teaching a course on world con-

New athletic director Doug Weaver eyes Muddy Waters. his choice for Spartan head football coach.

Andrew Young, former U.S. Ambassador to the United Nations, was a visiting professor at MSU spring term.

Technician Lester Morrison (above) wears magnifying glasses while emasculating wheat for a cross-breeding experiment. In the last decade, MSU wheat breeders have introduced four high-yielding soft, white winter wheat varieties in Michigan. Scientists at the nation's first agricultural college have contributed more than 100 new crop varieties to boost world food production.

flict and development. Young spoke at a one-day urban unrest teach-in held at MSU in May following racial disturbances in Miami.

As Young surely noted, discussions of world development are not unusual on campus. MSU was the first U.S. university to appoint a dean of international programs and is currently involved in educational and technical assistance programs in 22 countries. Last year, the U.S. Office of Education ranked the MSU African Studies Center as one of the leading centers of its kind in the ration.

The African Studies Center houses the MSU Peace Corp programs, which received an award last year from the program's national office for producing the largest number of volunteers in the last five years. During that time, more than 250 MSU students and faculty served abroad in corps assignments.

In July 1979, the U.S. Agency for International Development awarded the university a \$1.5 million strengthening grant under a federal program to ease world hunger by providing food production assistance to developing nations. The bulk of the funds will be used for projects administered by the Institute of International Agriculture in the College of Agriculture and Natural Resources—MSU's most internationally active college.

During the spring, the college's Agricultural Experiment Station hosted a one-week conference on "Animal Agriculture and Human Needs in the 21st Century," attended by more than 200 scientists, consumer advocates, and public officials. The Agricultural Experiment Station is the university's largest research unit, supporting more than 450 scientific projects in eight campus colleges and at 15 field stations throughout the state.

evidence that the university continues to fulfill the chief purpose for which it was founded 125 years ago—to improve and teach the science and practice of agriculture. But, just as modern agriculture has advanced through the introduction of high-yielding hybrids, the original agricultural college has become an academic hybrid blending a variety of teaching, research, and public service programs.

And, like Beal's hardy seeds, Michigan State University faces a decade of uncertainties with an inherent will to endure.

General Fund Revenues 1979-80

This fund is for general operation of the university and represents 53.1% of the total revenues. These amounts are included in the total revenues column and graph on page 11 at right.

Report of Ernst & Whinney, Independent Auditors

Board of Trustees Michigan State University East Lansing, Michigan

We have examined the statements of financial condition of the several funds of Michigan State University as of June 30, 1980, and the related statements of changes in fund balances and current funds revenues, expenditures and transfers for the year then ended. Our examination was made in accordance with generally ar epted auditing standards and, accordingly, included such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances. We previously made a similar examination of the financial statements for the preceding year.

In our opinion, the financial statements referred to above, shown on pages 18 to 33, inclusive, present fairly the financial position of the several funds of Michigan State University at June 30, 1980, and the changes in fund balances and the current funds revenues, expenditures and transfers for the year then ended, in conformity with generally accepted accounting principles applied on a basis consistent with that of a preceding year.

BRANT

MICHIGAN STATE UNIVERSITY

NOTE A -- SIGNIFICANT ACCOUNTING POLICIES

The financial statements have been prepared generally in accordance with the accounting principles outlined in the American Institute of Certified Public Accountants' audit guide, Audits of Colleges and Universities, and the Manual for Uniform Financial Reporting - State of Michigan Colleges and Universities, as revised. Transactions of the development fund have been reclassified from the Agency Fund to the Designated Fund in 1980 and certain current funds' expenditures for 1979 have been reclassified to conform to the 1980 presentation for comparability.

Fund Classification: The accounts of the University are summarized for financial reporting purposes into the following nine funds.

The current funds consist of the General, Designated (use restricted by University policy), Auxiliary Activities and Expendable Restricted (use restricted by donor or supporting agency). These funds are used to account for transactions related to the instructional and academic programs (including restricted purpose contracts and grants, research, extension and departmental programs) and the auxiliary activities which provide services to the student body, faculty and staff and public. The statement of current funds revenues, expenditures and transfers is a statement of financial activities of the current funds related to the current reporting period. It does not purport to present the results of operations or net income or loss for the period as would a statement of income or a statement of revenues and expenses.

The noncurrent funds and their functions are described as follows: (1) the Student Loan Fund is used to account for transactions related to loans to students; (2) the Endowment Fund as used to account for gifts which allow only the income thereon to be expended and includes similar funds under Board control; (3) the Plant Fund contains the transactions relating to investment in institutional physical properties (except those held for investment purposes), indebtedness incurred in the financing thereof and reserves for maintenance, replacement and insurance; (4) the ketirement and Insurance Fund contains transactions related to pension and life insurance plans controlled by the institution; and (5) the Agency Fund is used to account for amounts withheld from payrolls, employer portions of payroll taxes and various payroll benefits and for amounts held in custody for students, University-related organizations or others.

Accrual Accounting: The financial statements have been prepared generally on the accrual basis with the following exceptions, which are common practices in colleges and universities: (1) vacation pay is recorded when paid; (2) investment income and interest on student loans are recorded when received; (3) interest expense on debt is recorded when paid; and (4) gifts and pledges are recorded when received.

Institutional Physical Properties: Institutional physical properties are stated generally at cost. Amounts expended directly from current funds for equipment or other capital additions are included in expenditures or transfers of such funds and are capitalized in the Plant Fund. Depreciation is not provided on physical properties; however, certain repair and maintenance reserves have been established to provide for significant repair and maintenance costs to related facilities.

Inventories: Inventories are stated at the lower of average cost (book stores determined by the retail method) or market.

Revenue Recognitin: All revenues and related expenditures incurred in connection with the current summer school are deferred at June 30. Expendable Restricted Fund revenue is recognized only to the extent expended and State of Michigan appropriations for current funds are recognized when received. Medical service revenues are recognized on rae accrual basis in the period during which the service performed is billable, with appropriate allowances provided to give recognition to contractual adjustments and to accounts doubtful of collection.

NOTE B--MARKETABLE SECURITIES

The yields on marketable securities for the years ended June 30, 1980 and 1979, determined on a market basis, were as follows:

		1980		1979		
		Endownent Fund	Retirement and Insurance Fund	Endownent Fund	Retirement and Insurance Fund	
Interest and dividends Net market appreciation of securities TOTAL	The state of the s	8.17	7.12	6.92	6.1%	
		1.4	3.0	2.5	3.5	
	OTALS	9.5%	10.12	9.4%	9.62	

NOTE C--CONSTRUCTION IN PROGRESS

Construction in progress at June 30, 1980 includes costs of approximately \$283,000 for projects in the development and planning stage; therefore, estimated costs to complete are presented undeterminable. The costs to complete the remaining projects (principally modifications to a power plant and the construction of a communications arts building and performing arts center) are estimated to be \$24,500,000 and are to be funded from state capital outlay appropriations and/or University funds.

Investments: Investments are stated at cost or fair market value at date of gift.

NOTE D--NOTES AND BONDS PAYABLE

The principal and interest on notes and bonds of the Plant Fund (excluding an 8% note payable to a bank of \$14,000,000 and two 4 1/2% promissory notes to individuals aggregating \$1,386,000) are payable only from the net income of specific auxiliary activities or from designated student fees. The obligations are generally callable, bear interest at rates varying from 2.875% to 8.0%, and mature at various dates through 2004. Principal amounts payable within one year approximate \$2,835,000.

The term notes payable of the Student Loan Fund are payable from collections on the guaranteed student loans, bear interest at initial rates of 5 1/2% to 7% adjusted for market conditions, and mature in 1984 through 1990.

NOTE ..-- RETIREMENT PLANS

The University has contributory retirement plans for all qualified employees. The plans are administered by Teachers' insurance and Annuity Association of America - College Retirement Equities Fund (TIAA-CREF) and consist of employee-owned annuity contracts funded on a current basis. The University also provides termination benefits resulting from unused sick days upon retirement, permanent disability, or death of certain full-time employees. The present value of future retirement benefits attributed to prior service at January 1, 1980 (date of latest actuarial valuation) exceeded the market value of the assets of the fund at June 30, 1980 by approximately \$21,000,000.

Annual contributions by the University may be sufficient to provide for amortization of prior service and termination benefit costs and will consist of a combination of current funds and existing Retirement Fund assets in such portions that the Retirement Fund may be depleted over the established twenty-year funding period. During the year ended June 30, 1980, the University contributed \$11,680,754 to fund the current service requirements of the employee-owned annuity contracts and \$2,260,456 to the Retirement Fund to fund prior service cost of group annuity contracts.

The University 's life insurance benefits for certain employees upon retirement at an annual contribution rate of \$180,000 through 1986 and anticipates current cost contributions of \$60,000 thereafter. Certain other benefits, principally medical insurance, are provided to eligible retirees. Such benefits are funded on a current basis and no calculation has been made to determine the actuarial liability thereof.

NOTE F--CONTINGENCIES

In the normal course of its activities, the University is a party in various legal actions. Although some actions have been brought for large amounts, the University has not experienced significant losses. After taking into consideration legal counsel's evaluation of pending actions, the University is of the opinion that the outcome thereof will not have a material effect on the financial statements.

NOTE G-MICHIGAN STATE UNIVERSITY FOUNDATION

Michigan State University Foundation is an independent corpo ation formed for the purpose of receiving funds for the sole benefit of the University. At June 30, 1980, the fair value of the net assets of the Foundation approximated \$4,700,000 and are not included in the financial statements of the University.

NOTE H--PLEDGES

The University receives pledges and bequests of financial support from corporations, foundations and individuals. Due to changing circumstances relating to individual pledgors ability to pay amounts pledged, the amount of pledges which will be ultimately collected and the time periods over which they will be collected often are not readily determinable. Such pledges are primarily restricted for plant or endowment surposes and, including those of the Michigan State University Foundation, approximated \$6,400,000 at June 30, 1980.

Report prepared by University Publications under the direction of Kenneth W. Thompson, Vice President for Finance and Operations, Roger E. Wilkinson, Associate Vice President for Business and Finance, Stephen H. Terry, Assistant Vice President for Finance, and Jonas E. Cook, Assistant Controller, design by Dorris Birchfield, editing and production by Kathleen Schoonmaker. Narrative text by Laurie Wink, Associate Editor, College of Agriculture and Natural Resources. Photos furnished by Information Services unless otherwise credited.

NOTES TO AUXILIARY ACTIVITIES FUNDS

MICHIGAN STATE UNIVERSITY

Year ended June 30, 1980

Note A--Expenditures for housing and food services do not include any charge by the University for depreciation. Utility expense rates have been charged to the residence halls on the basis of normal capacity at a rate of \$53.94 per occurant for October through June. Each apartment has been charged for utilities at a rate of \$25.69 per month, except Spartan Village Apartments which were charged \$5.54 per month. Van Hoosen Hall has been charged \$3,453.00 for the fall, winter and spring terms. The M.S.U. Bookstore was charged \$3,741.25; the Laundry, \$6,515.42; the Food Stores, \$3,527.92 and the Union Building, \$3,676.00 per month.

Note B--Represents transfers (to) from Plant Fund.

Note C--Represents transfer from Residence Halls, Apartments, and Related Activities maintenance and repairs to Residence Halls and Apartments.

Note D--Represents transfers from the Trust Reserve in the amount required to supplement revenues to meet trust requirements (\$152,411.91).

Note E--Represents transfers from Residence Halls, Apartments, and Related Activities for past service retirement benefits.

Note 7--Represents transfer to Auxiliary Services from Residence Halls, Apartments, and Related Activities maintenance and repairs.

Note G--Represents transfer from Auxiliary Services to Cowles House.

Note H--Represents transfer from General Fund.

Note I--Represents transfer from (to) Designated Fund.

Note J--Represents transfers within Athletics and Related Activities.

Note K -- Represents transfer from Golf Course Store to Golf Course Grounds Mainten nce.

Note L--Represents transfers within Union Memorial Building.

Note M--Represents transfer from (to) Expendable Restricted Fund.

Note N--Represents transfer from Concessions to Intercollegiate Athletics.

Note O--Represents transfer from Auxiliary Services to Keliogg Center.

Note P--Represents transfer from Bookstore Reserve to Auxiliary Services.

Note Q--Represents transfer within internal Service Operations.

Note R--Represents transfer from Endowment Fund.

NOTES TO NOTES AND BONDS PAYABLE
AND MAJURITIES OF NOTES AND BONDS PAYABLE SCHEDULES

MICHIGAN STATE UNIVERSITY

Year ended June 30, 1980

Note A--Maturities are summarized based on fixed serial requirements or on planned payment requirements for notes and bonds not due serially. Such planned payment is based on minimum earnings or fee requirements as established by the trustee.

Note B--Secured by pledge of and lien on fees.

Note C--Secured by pledge of the proceeds of the sale of a long-term bond issue secured by a pledge of University fees, the sale of certain property, and the sale of assets of certain endowment funds; certain endowment fund income, pledges receivable through fund raising efforts, the pledge of borrowed funds and interest earned on the borrowed funds prio to use for authorized purposes, and the pledge of insurance proceeds.

Note D--Secured by pledge of and lien on net revenues of 400 Spartan Village III apartments.

Note E--Secured by pledge of and lien on net revenues of 100 Spartan Village II and 116 Cherry Lane apartments.

Note F--Secured by pledge of and lien on net revenues of Wilson residence hall.

Note G--Secured by pledge of and lien on net revenues of Snyder-Phillips Residence Hall and 348 University Village apartments.

Note H--Secured by pledge of and lien on net revenues of Wonders, McDonel and Owen residence halls.

Note 1--Secured by pledge of and lien on net revenues of Akers and Fee residence halls.

Rote J--Secured by pledge of and lien on net revenues of Brody Group, 108 University Village apartments and 228 Spartan Village IV apartments.

Note K--Secured by pledge of and lien on net revenues of Holmes, Hubbard, Mason-Abbott, West Circle (37%) and Yakeley-Gilchrist residence halls.

Note L--Secured by lien on all interest and principal payments received on student notes outstanding under the guaranteed student loan program.
