CONTROL

Mr. Ivan W. Smith, Chairman
The Atomic Safety and Licensing Board
25 North Court Street
Harrisburg, Pennsylvania 17101

Dear Chairman Smith:

I would like to go on record favoring the reactivation of Unit 1 on Three Mile Island operated by Metropolitan Edison Company. I strongly believe that the track record of this facility speaks well of its overall operations and that it should be placed back on line as soon as possible.

It did definitely help to provide those of us in the Med Ed Service Area with the additional electricity that is being demanded by it's customers at a more reasonable rate being purchased from other electrical companies at the present time.

Sincerely,

Thomas R. Caltagirone
