Mr. Ivan Smith, Chairman
Licensing Board
Nuclear Regulatory Commission
1717 H. Street N.W.
Washington, D.C. 20555

re: TMI-1

Dear Mr. Smith:

I strongly oppose the licensing of TMI-1 for restart.

The performance of Metropolitan Edison throughout the history of the accident at TMI-2 is evidence they are incapable of operating a nuclear power plant.

The citizens of the TMI area should not tolerate anymore experimentation for the nuclear industry.

If the NRC and others do not have knowledge as to the control of this devastating source of energy, and I believe all the evidence to date points to the fact that they do not, a license should not be granted. The safety of the people - not politics - should govern the future of nuclear power.

I'm sure you are aware of the concern of the citizens in the TMI area and will deny the license for restart of TMI-1 and accelerate the safe and complete clean-up of TMI-2.

Yours truly,

m
