

APPENDIX A  
NOTICE OF VIOLATION

Metropolitan Edison Company  
Three Mile Island Unit 1

Docket No. 50-289  
License No. DPR-50

As a result of the inspection conducted February 25 - March 31, 1981, and in accordance with the Interim Enforcement Policy, 45 FR 66754 (October 7, 1980) the following violation was identified.

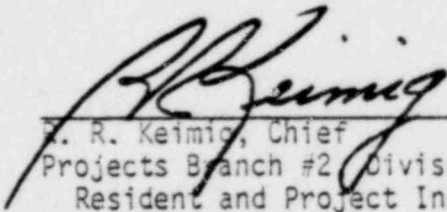

10 CFR 20.201(b) requires that you make such surveys as may be necessary for you to comply with all sections of Part 20. As defined in 10 CFR 20.201(a), "survey" means an evaluation of the radiation hazards incident to the production, use, release, disposal, or presence of radioactive materials or other sources of radiation under a specific set of conditions.

Contrary to this requirement, you failed to make such surveys as were necessary to assure compliance with 10 CFR 20.101(a), "Radiation dose standards for individuals in restricted areas." Specifically, as of February 20, 1981, you failed to evaluate discrepancies in the radiation surveys of waste materials which you transferred to Unit 2 during December 1980 and January and February 1981. These radiation surveys were necessary to control the exposure to personnel handling the materials.

This is a Severity Level IV violation.

Pursuant to the provisions of 10 CFR 2.201, Metropolitan Edison Company is hereby required to submit to this office within 25 days of the date of this Notice, a written statement or explanation in reply including the corrective steps which have been taken and results achieved; corrective steps which will be taken to avoid further violations; and the date when full compliance will be achieved. Under the authority of Section 182 of the Atomic Energy Act of 1954, as amended, this response shall be submitted under oath or affirmation.

Date JUN 01 1981
