

32267

PUBLIC SERVICE COMPANY OF COLORADO

P. O. BOX 840 · DENVER, COLORADO 80201

R. F. WALKER
PRESIDENT

June 9, 1981

P-81166

Mr. Harold Denton
U. S. Nuclear Regulatory Commission
Washington, DC 20555

Dear Mr. Denton:

A reassessment was recently performed of the executive management responsibilities associated with the Fort St. Vrain Nuclear Generating Station. A major finding of this assessment is the need to properly clarify the Vice President, Electric Production's role as the primary executive officer responsible for the Fort St. Vrain facility. Effective July 1, 1981, Mr. O. R. Lee, Vice President, Electric Production, will be responsible for all aspects of the Fort St. Vrain facility including operations, quality assurance, engineering and construction. Accordingly, please address all correspondence associated with the Fort St. Vrain facility to Mr. O. R. Lee rather than Mr. C. K. Millen or Mr. J. K. Fuller as follows:

Public Service Company of Colorado
Attention Mr. O. R. Lee, Vice President,
Electric Production
P. O. Box 840
Denver, Colorado 80201

A Technical Specification change is currently being prepared for submittal to the NRC which changes the designated Nuclear Facility Safety Committee reporting function from the Senior Vice President, Operations, to the Vice President, Electric Production.

Please contact me if further clarification of this matter is required.

Sincerely,

R. F. Walker
