DOCKET NOS 50-329, 50-330
IE BULLETIN 80-05
FILE: 0505.12 UFI: 99*02*05*10 SERIAL: 12768
REFERENCE: CP CO LETTER SERIAL 9858 DATED OCTOBER 1, 1981

This letter is to modify our previous response, Serial 9858 dated October 1, 1981, which closed out the subject bulletin. The modification is that the table shown in our previous response indicates that the reactor coolant pump seal drain tanks, 1T85/2T85, are equipped with vacuum breakers and a nitrogen cover gas system.

A recent design change will remove the reactor coolant pump seal drain tanks from the Midland design.

Revision 34 of the FSAR, to be submitted in June 1981, will revise the appropriate FSAR sections and tables to eliminate reference to these tanks.
