Mr. Gunnar A. Harstead  
Harstead Engineering Associates, Inc.  
169 Kinderkamack Road  
Park Ridge, N.J. 07656

Dear Mr. Harstead:

This is to inform you that two consultants have been selected for the task the Office of Inspection and Enforcement had defined for completion of the Marble Hill Nuclear Generating Station, Units 1 and 2 near Madison, Indiana. You had been contacted earlier about the possibility of interest by you or your organization in such an effort in the problem area of concrete construction.

The consultants selected after input from and discussions with the intervenors in this case are:

Alfred L. Parme, Consulting Engineer  
San Diego, California

Roland C. Hamm, Hamm Engineers, Inc.  
San Diego, California

Both will be working for the NRC through a standing multidiscipline, technical support contract with Parameter Engineers, Inc., of Elm Grove, Wisconsin. We greatly appreciate your efforts in responding to our initial phone call on this task. We will maintain the information you provided for possible future use.
