Inspection Summary

Areas Inspected

A special security inspection was conducted to review security practices at the fuel storage areas. Review licensee security plan for the protection of the fuel and resolve a allegation concerning security practices that was received by the NRC investigative staff on September 9, 1980. The inspection involved nine inspector-hours on site by three NRC inspectors. The inspection was conducted during normal working hours.

Results

The licensee was found to be in compliance with NRC requirements in the fuel storage areas examined during the inspection.
