Mr. James E. Miller, Chief
Special Projects Branch
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Docket No. 50-267

Subject: Technical Specification Changes
LCO 4.3.10 and SR 5.5.3

Dear Mr. Miller:

This letter is to propose the following changes to the Fort St. Vrain Technical Specifications:

LCO 4.3.10, Table 4.3.10-1	(Attachment 1)
SR 5.5.3a) and Basis	(Attachment 2)

In accordance with the provisions of 10CFR170, we believe that the proposed changes are amendment fee Class II, since they are pro forma and administrative in nature.

We request that the two proposed changes be reviewed and approved for the change of one Class II change as described in the NRC "Guidance for Assessing the Proper License Fee - License Amendments and Approvals." Since the change requested to LCO 4.3.10, Table 4.3.10-1 is submitted in accordance with the requirements of LCO 4.3.10(e), and since the change requested to SR 5.5.3 reflects the regulatory position for obtaining carbon adsorber samples, we believe that the request is consistent with 10CFR170 and the guidance document.

A check in the amount of \$1,200 for the fee payment is attached.

We request your concurrence with the proposed changes as soon as possible.
