STN 50-547  
Construction Permit Nos.:  
CPPR - 170  
CPPR - 171

Marble Hill Nuclear Generating Station - Units 1 and 2

Dear Mr. Denton:

In the "Description of Licensee Activities" Public Service Company of Indiana, Inc. (PSI) said that Quality Engineers would review and comment on drawings, specifications, and contractor procedures in defining accept/reject criteria. PSI believes that the following sentences better describe the work of Quality Engineers:

"Quality Engineers review and comment on specifications and contractor procedures. They may use drawings, in conjunction with specifications and procedures, as an aid in declaring more specific accept/reject criteria."

Review and approval of Engineering Documents (i.e. drawings) are designated the responsibility of Sargent and Lundy Engineering Groups, as stipulated in the second paragraph of Section III-C-3 of the "Description of Licensee Activities."

In conclusion, PSI believes this clarification does not have an impact on quality, but further specifies organizational parameters and describes more discriminately the process of our program.
