SNM-1513

Eastman Kodak Company
Health, Safety and Human Factors
Laboratory
ATTN: Mr. E. Scott Harter
Radiation Safety Officer
1669 Lake Avenue
Rochester, New York 14650

Gentlemen:

Enclosed is Materials License No. SNM-1513 which is being reissued using the same license and docket numbers. This reissuance is at the convenience of the Commission in order to maintain a continuing record of your docket. Please note that the license is being reissued for a six-month term, expiring July 31, 1981.

Since your initial application was filed, several amendments have been made to the license. Therefore, we are requesting that the renewal application, for extension of this license beyond July 31, 1981, be complete in itself without reference to previous applications.

Also, the revised application shall include additional information which has been discussed with you during Dr. Soong's trip to your facility on January 16, 1981.

The consolidated application should be filed with the Commission no later than April 30, 1981, and if possible, should be filed prior to or concurrent with any application for amendment of the reissued license.

Sincerely,

R. G. Page, Chief
Uranium Fuel Licensing Branch
Division of Fuel Cycle and
Material Safety

Enclosure: Materials License
No. SNM-1513
