

DOCKET NUMBER **PR 73**
PROPOSED RULE
45 FR79492

January 14, 1981
L-81-15

(10)

Office of Nuclear Reactor Regulation
Secretary of the Commission
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Attention: Docketing and Service Branch

Dear Sir:

Re: Proposed Amendment to 10 CFR 73.55 in Regard
to Searches of Individuals at Power Reactor
Facilities

In response to your referenced proposed rule, Florida Power & Light Company submits the following comments. FPL feels that the "NRR Supplemental Staff Position on Personnel Search Requirements, September 30, 1977", with which FPL presently complies, provides adequate assurance that power reactors are adequately protected against sabotage by an insider. The additional requirements for 100% physical pat-down searches for regular plant employees and other licensee employees at certain times adds little to station security but will be detrimental to employee morale and to timely processing of individuals into the plant.

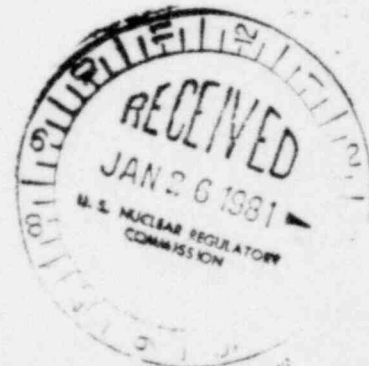

We appreciate your attention to these comments.

Very truly yours,

Robert E. Uhrig
Vice President
Advanced Systems & Technology
