Docket No. 50-219
LS05-80-12-015

Mr. I. R. Finfrock, Jr.
Vice President - Generation
Jersey Central Power & Light Company
Madison Avenue at Punch Bowl Road
Morristown, New Jersey 07960

Dear Mr. Finfrock:

RE: SEP TOPICS III-10.A, V-11.A, VI-7.C.1, VIII-3.B, VIII-4
OYSTER CREEK NUCLEAR GENERATING STATION

Our letter of July 3, 1980 forwarded copies of our current evaluation of Systematic Evaluation Program Topics III-10.A, Thermal-Overload Protection for Motors of Motor-operated Valves; V-11.A, Electrical, Instrumentation, and Control Features for Isolation of High and Low Pressure Systems; VI-7.C.1, Independence of Redundant Onsite Power Systems; VIII-3.B, DC Power System Bus Voltage Monitoring and Annunciation; VIII-4, Electrical Penetration of Reactor Containment. These assessments compare your facility, as described in Docket No. 50-219, with the criteria currently used by the regulatory staff for licensing new facilities.

In our letter, we requested that you inform us within 60 days of receipt of our letter if your facility differed from the basis assumed in our reports.

Because we have received no comments we now consider these reports to be final. These evaluations will be a basic input to the integrated safety assessment for your facility unless you identify changes needed to reflect the as-built conditions at your facility. This topic assessment may be revised in the future if your facility design is changed or if NRC criteria relating to this topic are modified before the integrated assessment is completed.

Sincerely,

Dennis M. Crutchfield
Dennis M. Crutchfield, Chief
Operating Reactors Branch #5
Division of Licensing
