SEP 11 1968

Yankee Atomic Electric Company
441 Stuart Street
Boston, Massachusetts 02116

Attention: Mr. Richard A. Cordin
Executive Assistant

Gentlemen:

On July 31, 1968, in connection with the safeguards inspection of the special nuclear material possessed pursuant to your AEC License Numbers SNM-371 and DPR-3, we informed you that we would write you again upon completion of the ISOCHECK calculations of the production and depletion of special nuclear material as reflected in your operations.

This will confirm that our ISOCHECK calculations have been completed and we have concluded that Yankee's reported quantities of nuclear material depleted and produced accurately reflected results of reactor operation for the period under review.

We understand from your letter of August 13, 1968, that written material control and accounting procedures have been prepared as required by § 70.51(b)(1) of 10 CFR 70, "Special Nuclear Material". These procedures will be reviewed during the next safeguards inspection of your facility.

Sincerely,

Original Signed by
R. P. Wischow

R. P. Wischow, Director
Division of Nuclear
Materials Safeguards
