UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

NOV 05 1980

Docket No. 50-213

Mr. W. G. Council, Vice President
Nuclear Engineering and Operations
Connecticut Yankee Atomic Power Company
Post Office Box 270
Hartford, Connecticut 06101

Dear Mr. Council:

SUBJECT: HADDAM NECK - SEP TOPIC XVI, TECHNICAL SPECIFICATIONS

The objective of SEP Topic XVI, "Technical Specifications" is to assure that safety limits and operational safety measures are specified in order to minimize the probability or consequences of accidents. In order to assure that the implementation of appropriate technical specifications will conform to the overall objective of the SEP program, we have decided to delay completion of SEP Topic XVI, Technical Specifications, until the completion of all other SEP Topic reviews and the Integrated Safety Assessment. This will allow for an integrated evaluation of current Technical Specifications with any proposed Technical Specification changes resulting from individual SEP topic reviews.

If you have any questions or comments toward this regard please inform the NRC in a timely manner.

Sincerely,

Dennis M. Crutchfield
Dennis M. Crutchfield, Chief
Operating Reactors Branch No. 5
Division of Licensing
