BRUNSWICK STEAM ELECTRIC PLANT, UNIT NO. 1
DOCKET NO. 50-325
LICENSE NO. DPR-71
FUEL CYCLE NO. 3 - DATA CORRECTION

Dear Mr. Ippolito:

In a May 23, 1980 letter, Carolina Power & Light Company (CP&L) submitted the technical information necessary for the refueling and Cycle 3 startup of Brunswick Steam Electric Plant (BSEP) Unit No. 1. This information included forty (40) copies of General Electric's (GE) NEDO-24239, "Supplemental Reload Licensing Submittal for BSEP Unit 1 Reload 2."

Recently, CP&L discovered a typographical error on page 2 of NEDO-24239 where the R-factors for 8x8 fuel and P8x8R fuel had been interchanged. All calculations for the reload utilized the correct R-factor for each fuel type; therefore, there are no errors in the calculations or results. Forty (40) copies of the corrected page 2 are attached to this letter for your use in updating the NEDO report.

Please call us should you have any questions concerning this information.

Yours very truly,

E. E. Utley
Executive Vice President
Power Supply and
Engineering & Construction
