UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

NOV 2 5 1980

MEMORANDUM FOR: Charles R. Troutman, Director
Division of Automatic Data Processing Support

THRU: Bernard J. Snyder, Program Director
Three Mile Island Program Office
Office of Nuclear Reactor Regulation

FROM: Richard Weller, Section Leader
Safety Review Section
Three Mile Island Program Office, NRR

SUBJECT: USE OF A COMPUTER TERMINAL

The Three Mile Island Program Office (TMIPO) has identified a need for
a computer terminal. As the clean up effort continues, the volume of
data generated continues to grow. The TMIPO staff has identified an
immediate need to develop the capability to store and retrieve data in
a timely fashion. There is a continuing need to run parametic calcu-
lations that would be performed more effectively on a computer. At this
time, we feel that a Silent-700 terminal would satisfy our needs. The
contact in the TMIPO is Lawrence Bell, he can be reached on extension
28285.

Richard Weller, Section Leader
