ENVIRONMENTAL QUALIFICATION RECORDS FILE

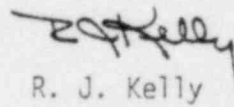

ATTENTION: Darrell G. Eisenhut

Gentlemen:

In compliance with the Order for Modification of Licenses Concerning Environmental Qualification of Safety-Related Electrical Equipment dated October 24, 1980, Georgia Power Company has established a complete and auditable records file which describes the environmental qualification method used for all safety-related electrical equipment covered by I&E Bulletin 79-C1B in sufficient detail to document the degree of compliance with the DOR Guidelines on NUREG-0588. Hereafter, these records will be updated to include all safety-related electrical equipment and will be maintained current as equipment is replaced, further tested, or otherwise further qualified.

If you have further questions, please contact this office.

Very truly yours,

  
R. J. Kelly
