

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D. C. 20555

November 19, 1980

Docket No. 50-285

Mr. W. C. Jones  
Division Manager, Production  
Operations  
Omaha Public Power District  
1623 Harney Street  
Omaha, Nebraska 68102

Dear Mr. Jones:

We have reviewed your November 7, 1980 letter concerning quality control of emergency diesel generator fuel oil. Our review indicates that the program proposed for the Fort Calhoun Station, which was submitted by letter dated May 2, 1980 (in response to the January 7, 1980 NRC request) as supplemented by your November 7, 1980 letter (which was submitted in response to the September 17, 1980 NRC request) adequately address the staff's concerns on diesel fuel oil.

The staff, therefore, considers this generic issue, which we have designated A-15 "Quality Assurance Regarding Diesel Generator Fuel Oil", to be closed for the Fort Calhoun Station. If you have any questions on this subject, please contact your assigned Project Manager.

Sincerely,

Robert A. Clark, Chief  
Operating Reactors Branch #3  
Division of Licensing
