(Virgil C. Summer Nuclear Station, Unit 1)

NOTICE OF ISSUANCE OF AMENDMENT TO CONSTRUCTION PERMIT

Notice is hereby given that, pursuant to a Decision by the Atomic Safety and Licensing Appeal Board dated April 13, 1973, the Deputy Director for Reactor Projects, Directorate of Licensing, has issued Amendment No. 1 to Construction Permit No. CPPR-94 to the South Carolina Electric and Gas Company for the Virgil C. Summer Nuclear Station, Unit 1. This amendment deletes condition 2.E.5 which required South Carolina Electric and Gas Company to establish a radiation monitoring program (during facility operation) to assure that the dosage to the thyroid organ of a child through the pasture-cow-milk pathway not exceed a designated value. The radiation monitoring program will be reviewed prior to the issuance of an operating license. This amendment does not involve any radiological health and safety matters which were not considered by the Atomic Safety and Licensing Board during the course of the evidentiary hearing on the construction permit application.
