Gentlemen:

I am writing in support of the proposed rule on page 67018 of the October 8, 1980 Federal Register. I also would support the application of similar logic to other low specific activity waste from the same kinds of research and diagnosis. For example, a level of specific activity for Iodine-125 wastes below which the waste no longer requires disposal as radioactive, would help in the optimal management of such materials. Thank you.

Yours truly,
