SACRAMENTO, CALIFORNIA

DEC 1 - 1980

Honorable Samuel J. Chilk  
Secretary of the Commission  
U. S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Attention: Docketing and Service Branch

Dear Mr. Chilk:

The State of California has reviewed the proposed rule, Standards for Protection Against Radiation, amending regulations to permit licensees greater leeway in disposing of liquid scintillation media and animal carcasses containing tracer levels of hydrogen-3 (tritium) or carbon-14, Docket No. PR 20 (45 FR 67018), which was submitted through the Office of Planning and Research (State Clearinghouse) in the Governor's Office.

The State's review, which fulfills the requirements of Part II of Office of Management and Budget Circular A-95, was coordinated with the Departments of Fish and Game, Food and Agriculture, Health, and Water Resources; and the Air Resources, Solid Waste Management, and State Water Resources Control Boards.

Although we have no comment on the proposal, we appreciate having been given an opportunity to review it.

Sincerely,

JAMES W. BURNS  
Assistant Secretary for Resources
