Mr. Dan Gillen
Uranium Mill Licensing Section
Div. of Fuel Cycle & Material Safety
7915 Eastern Avenue
Silver Springs, MD 20906

Dear Mr. Gillen:

As you requested when we met in your office on November 4, 1980, I am transmitting here with twenty five copies of Dames & Moore's report entitled "Report on Alternate Evaporation Pond Site Evaluations, West Gas Hills, Wyoming for Federal-American Partners". This is the feasibility study to determine suitable alternate evaporation pond sites which was being prepared at the time we responded to the hydrologic questions concerning our August 29th submittal (See my letter to John Linehan dated October 17, 1980).

It is our intention at this time to utilize, the extent possible, the already disturbed sites in the Bullrush and Sagebrush areas and avoid disturbing the Eureka area. This will be discussed in more detail in the seepage study report being prepared at this time by Dames & Moore.

Yours very truly,

N. J. Andrus
