UNIT NO 2, DOCKET NO 50-330

LETDOWN COOLER SUPPORTS

FILE: 0.4.9.38 UFI: 73*10*01, 15240(E), 02312(S) SERIAL: 10994

Reference: CPCo Letters to J G Keppler, Same Subject:

- 1) Serial Howe-64-80, dated March 27, 1980
- 2) Serial 9180, dated June 19, 1980
- 3) Serial 9769, dated October 10, 1980

This letter, as were the referenced letters, is an interim 50.55(e) report concerning the overstressed condition in letdown cooler supports.

The manufacturer and B&W are still in the process of analyzing the letdown cooler supports based on the actual nozzle loads supplied by the Architect/Engineer. The result of the analyses were expected to be available by December. Once these loads are available, the Architect/Engineer will analyze the existing support to determine the extent of the modification required.

Another report, either interim or final, will be sent on or before January 30, 1981.
