Mr. John A. Linehan, Section Leader
Uranium Recovery Licensing Branch
Division of Waste Management
Nuclear Regulatory Commission
Washington, D.C. 20555

Lic. #40-3453
Docket SUA 917

Dear Mr. Linehan:

The following is a listing of the items that we would like to discuss in your Washington offices on December 11:

- (1) The future storage of tailings. We have completed the alternate storage study in accordance with your request, and will present a preliminary plan for below grade disposal of tailings at the existing site. An integral part of this plan is to construct additional raises on the present storage facility.
- (2) Seepage Study. Your October 24, 1980 letter concerning seepage has been answered in part by our letter of November 10. We need to discuss and clarify many of the points raised in your October 24 letter.
- (3) Surety.
- (4) 40 CFR 190.
- (5) License Condition #11. Our recent correspondence discusses 850 metric tons per year of yellowcake production.
- (6) The impact on Atlas of the rules and regulations published in the Federal Register on Friday, October 3, 1980.

In accordance with a discussion with Mr. Garcia this meeting is scheduled to start at 9:00 AM and will quite probably take the entire day.

Very truly yours,

Gordon T. Swanby
