SUBJECT: ATWS FOIA - FOIA 80-587 -- REQUEST FROM ANTHONY EARLEY FOR
51 CATEGORIES OF DOCUMENTS RE: ATWS

An FOIA request for documents that support 51 specific references in NUREG-0460, SECY-80-409 and its enclosures (including the enclosures dealing with value-impact and Browns Ferry 3) has been filed. A copy is enclosed for your information. Rather than search the files and extract only those documents that are relevant to the 51 references, all of the documents in your files that are relevant to ATWS should be made available to the requester, with some exceptions. The exceptions are proprietary documents; however, a list of the proprietary documents is required. Also indicate if there is a nonproprietary version. Other documents you believe should not be released need not be provided, but a list of these with the reason for withholding the documents (e.g., pre-decisional) should be provided. Since the requester already has NUREG-0460, SECY-80-409, NUREG/CR-0400 (the Lewis Report) and SECY-80-504 (Iodine Release During Reactor Accidents), these need not be supplied.

Therefore, you are requested to collect all ATWS related documents in your files and send them or a list, if they are proprietary or if they are being withheld for other reasons, to Valeria Wilson, P-433, by December 15, 1980 (if the quantity is large, call Valeria on Ext. 28972 to arrange for pickup). The documents should be identified with your name and organization, room number, etc. so they can be returned to you.

A handwritten signature in cursive script that reads "Herbert N. Berkow".
