Director of Nuclear Reactive Regulation
US Nuclear Regulatory Commission
Washington, DC 20555

DOCKET 50-155, LICENSE DPR 6 -
BIG ROCK POINT PLANT

Transmitted herewith are three (3) originals and thirty seven (37) conformed copies of the proposed change to the Technical Specifications for the Big Rock Point Plant, Docket 50-155, License DPR 6.

In addition, also attached is a change to the draft Technical Specifications which were submitted for NRC review June 7, 1974. This change to the draft Technical Specifications is submitted to keep the draft specifications which are presently under review consistent with the requirements in the existing Technical Specifications.

The purpose of this change is to define administrative control requirements associated with the air ejector off-gas monitoring system. Difficulties with this system were encountered as described in our letter of June 26, 1972 and supplemented in our letters of January 21, April 23 and May 3, 1974 and February 21, 1975.
