DOCKET 50-155 - LICENSE DPR-6 -  
BIG ROCK POINT PLANT - DG BATTERY T/S

By letter dated December 7, 1977, Consumers Power Company was requested to propose Technical Specifications changes incorporating limitations and surveillance testing of d-c power supplies utilized in initiating operation of on-site a-c emergency power sources. A thorough review of these systems indicated that additional vendor data was required in order to develop the specifications. The vendor has been contacted; however, the necessary data has not yet been received. It is fully expected that the information will be available in the next few weeks and that submittal of the requested Technical Specifications will be made by April 1978.
