US Nuclear Regulatory Commission
Washington, DC 20555

DOCKET 50-155, LICENSE DPR-6
BIG ROCK POINT PLANT

By letter dated March 11, 1975, Consumers Power Company transmitted draft Technical Specifications for the Big Rock Point Plant. Since that time, discussions with members of the Regulatory Staff have resulted in additional revisions to the draft Technical Specifications. These revisions are contained in the attachment to this letter. The pages contained in this attachment are labeled "Rev D, 12/2/75." These individual pages should be substituted for the identically numbered pages in the specifications transmitted March 11, 1975 and revised through May 30, 1975.

The reevaluation of the battery discharge limit contained in the specifications submitted March 11, 1975 has been completed and appropriate changes are included in the attached revised pages. In addition, revised pages are included to bring the Big Rock Point Plant into closer conformance to 10 CFR 50, Appendix J. These revisions resulted from our review of 10 CFR 50, Appendix J. A summary of this review was submitted by letter dated September 15, 1975.
