Docket No. 50-302  
Operating License No. DPR-72  
I.E. Bulletin 79-01B: ENVIRONMENTAL QUALIFICATION  
OF CLASS IE EQUIPMENT

Dear Mr. O'Reilly:

This letter is to provide additional clarification in regards to the evaluation of the service condition profiles as required by the subject Bulletin.

For all the equipment evaluated in our revised October 30, 1980, issue of the 79-01B response, the actual service conditions were compared with the available qualification data to assure that the actual conditions were enveloped within the qualification profile. The data included in the Environment/Qualification column of the System Component Evaluation Work Sheets is typically the peak value for the evaluated data.

This information was discussed with your Mr. Milton Hunt in a telephone conversation on December 12, 1980.
