Re: Docket 50-155 License DPR-6

Mr. Karl Goller
Assistant Director for
Operating Reactors
Directorate of Licensing
US Atomic Energy Commission
Washington, DC 20545

Dear Mr. Goller:

Mr. Donald J. Skovholt's letter of February 4, 1974 stated that the Big Rock Point FHSR did not explicitly address and evaluate the probability of damage due to a postulated spent fuel shipping cask drop accident and requested that possible damage in the event of a cask drop be evaluated. The letter request further requested that a report of our analysis and any proposed modifications be submitted by May 1, 1974.

Consumers Power Company has engaged a consultant to perform the detailed structural analysis necessitated by the February 4, 1974 letter. This analysis will not be completed until June 1974. We have discussed this with a member of the Directorate of Licensing Staff and stated that we would submit the analysis requested by the February 4, 1974 letter by July 1, 1974. He agreed with this delay in the requested submittal. This letter is written to document the extension request such that scheduling of reviews by the licensing staff can be appropriately revised.

Yours very truly,

Ralph B. Sewell
Nuclear Licensing Administrator
