Attn: Mr. Robert A. Clark, Chief
Operating Reactors Branch #3
Division of Licensing

Subject: Calvert Cliffs Nuclear Power Plant
Units Nos. 1 & 2, Dockets Nos. 50-317 & 50-318
Service List for Correspondence

Ref: EG & E letter dated 10/30/80 from R. C. L.
Olson to R. A. Clark, same subject

Gentlemen:

We have noticed a continuing inconsistency in the NRC's service list (cc list) for distributing copies of NRC correspondence on the Calvert Cliffs dockets. This problem was previously documented in the referenced letter. Recently, copies were received of letters which were dated November, 1980 (over a month late). In one case, a letter on the subject of NUREG-0577, Lamellar Tearing of Supports, a meeting notice was given for mid - December, but the letter was not received until January.

It appears that this problem is more prevalent with NRC letters addressed to "All Power Reactor Licenses" as opposed to letters which are addressed specifically to our Vice-President.

In addition, the Service List used by NRR remains out of date even though we have actually re-typed it and submitted it to your office (see reference).

Attached is an updated Service List. Please destroy all old service list for the above dockets.

Sincerely,

R. C. L. Olson
Principal Engineer
Nuclear Licensing and Analysis Unit
