Secretary of the Commission
United States Nuclear Regulatory Commission
Washington, D.C. 20555.

Attention: Docketing & Service Branch

To whom it may concern:

I realize the present need for nuclear energy, but more stringent attention should be paid to safety precautions of the plants & of their waste materials. Therefore, I sincerely urge you to retain the regulations prohibiting the possession, use, & transfer of low enriched uranium as a contaminant in metals. All radiation is dangerous and I will not tolerate products made from this radioactive scrap metal to be used in daily life.

Unfortunately, the recent actions of nuclear plant corporations will seemingly do anything to make a buck. But, now, by further endangering people by these recent attempts can only be condemned as callous actions.

Please respond to me in this matter

Sincerely,
Beth F. [Signature]
