Mr. Robert O'Neill  
Director, Congressional Relations  
Atomic Energy Commission  
Washington, D. C. 20545

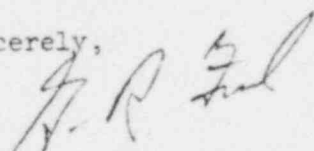

Dear Mr. O'Neill,

The enclosed copy of recently received correspondence from my constituent, Mrs. Calvin Miller of Grand Rapids, is being forwarded for your consideration and advice.

I will greatly appreciate information upon which to base a response to my constituent who fears a "disaster" in our state.

With my thanks and kind regards.

Sincerely,

  
Gerald R. Ford, M.C.

House of Representatives  
Washington, D. C.

Dear Sir,

It was with a great deal of concern that I read this morning's Detroit Free. The article I refer to is about the Big Rock Point nuclear power plant at Charlevoix being loaded with plutonium beginning this Saturday. How can we permit this? The story well documents the negative feelings of a number of experts in the field.

The AEC is still in doubt about any safety device at such a plant. Yet they gave approval! Apparently none of them live in Michigan.

There has already been a leak at this plant yet the approval was not withdrawn.

We could be heading for a disaster in this state such as our country has never seen. Let's have some foresight instead of appalled hindsight.

Please exert your considerable influence to forestall any plutonium being shipped to Charlevoix.

Yours truly,

/s/

Gladys Miller

POOR ORIGINAL

The AEC would be that

about any other cases at

such a point. get they gave

approval; apparently none

of them have in Michigan.

There has already been

a lot of the point yet the

opinion was not sufficient.

We would be looking

for a decision in the state

such as our country has

never seen. It's a time

of some thought instead of

apparent thought.

It seems a great year

to characterize influence to further

any procedure being changed

to character.

Yours truly,  
Henry Miller
