LOS ANGELES, CALIFORNIA 90024

January 29, 1981

James R. Miller, Chief  
Standardization and Special Projects Branch  
Division of Licensing  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Mr. Miller:

In reference to your letter of January 12, 1981: We are scheduling reactor operations to conform with the self-protection criteria for the in-core fuel. As this represents a temporary arrangement, we are proceeding to identify viable options for the reduction of our unirradiated SNM inventory.

Two options have been identified; (1) transfer to the DOE Lawrence Livermore National Laboratory (LLNL), and (2) return to DOE, Idaho Falls. The DOE and LLNL have tentatively indicated the acceptability of either destination, subject to approval of final plans.

Very truly yours,

Walter F. Wegst, Director  
Research & Occupational  
Safety
